VeraHire

The AI recruiter that runs your whole first round.

Good candidates take another job while they wait for your call.

You post one frontline job and hundreds of people apply. Your team has time to call a few of them.

Nobody reads the rest of the resumes.

VeraHire

How VeraHire works, in three steps.

1

You paste the job description

VeraHire lists the requirements and scores each resume against them.

2

You choose who to interview

Invite the candidates with the best scores, invite everyone, or pick them one by one. Each candidate does a voice interview with the AI.

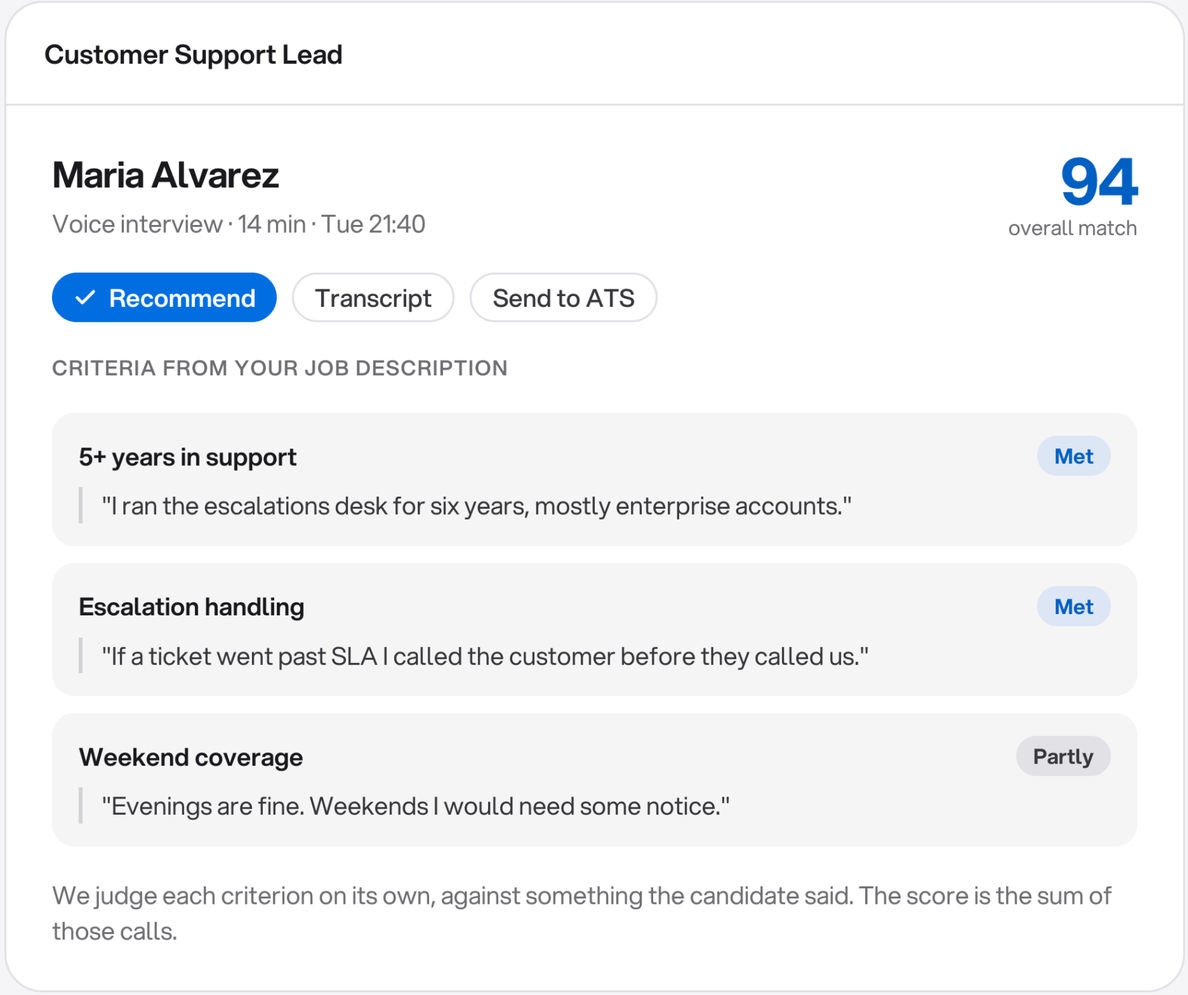

3

You get a ranked shortlist

VeraHire ranks the candidates and shows the reason for each score. Your team decides who moves forward.

You see the reason for every score.

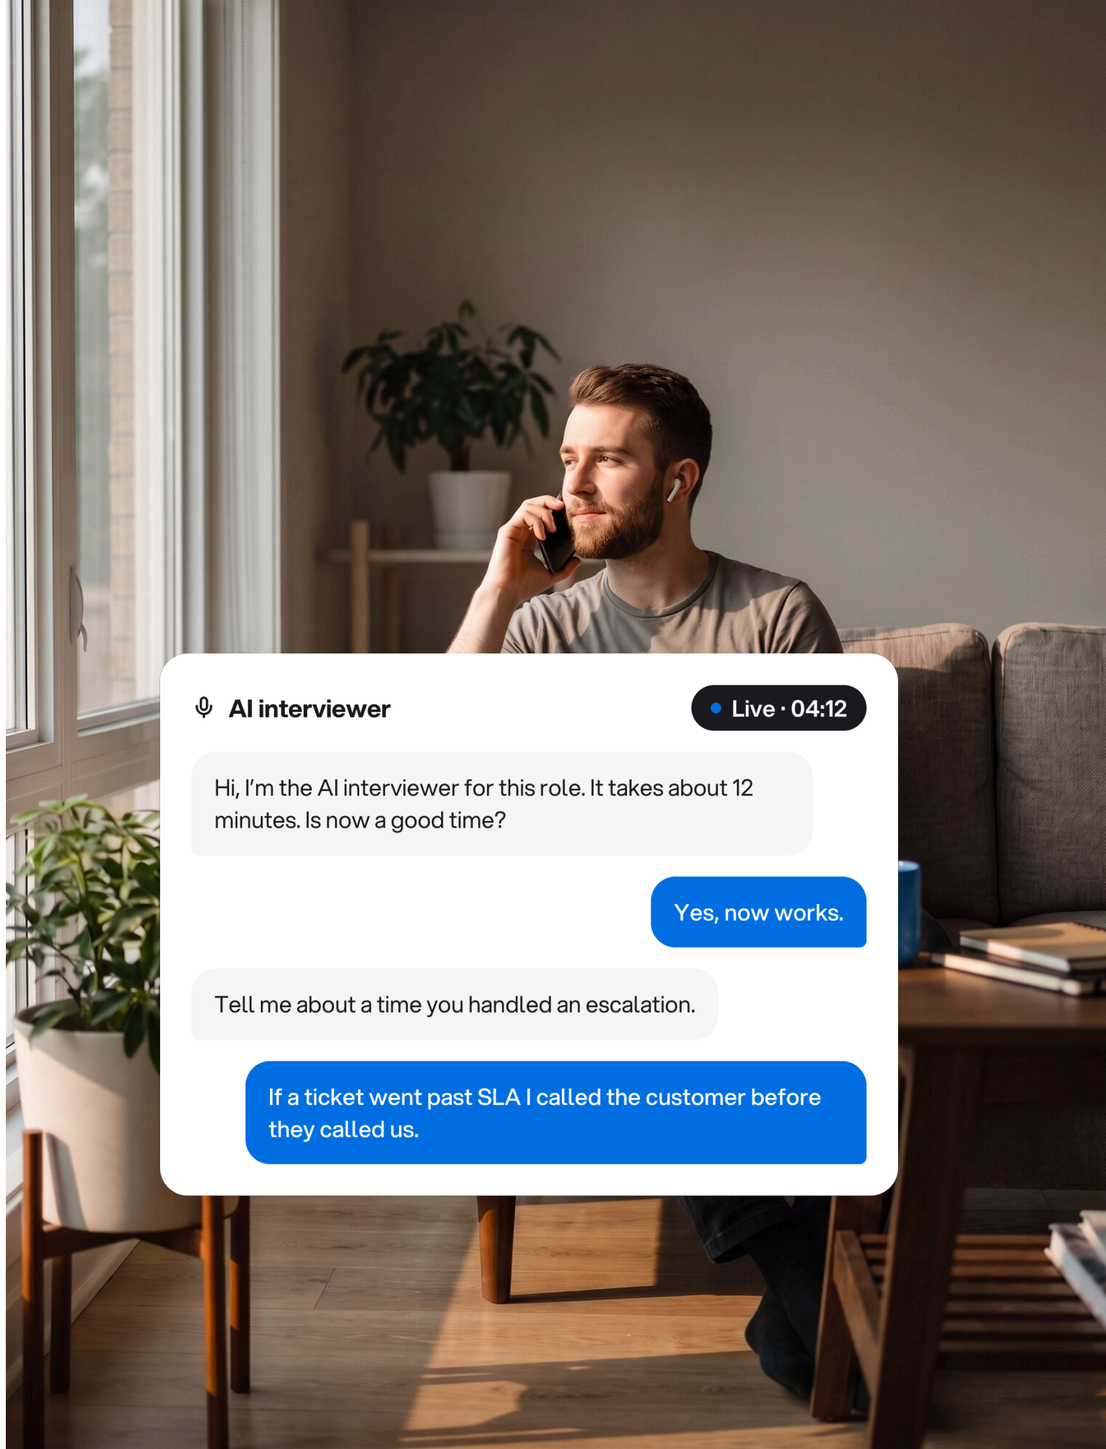

VeraHire marks each requirement in the job description as met, partly met or not met. Next to each one, you see the candidate's own words.

Candidates take the interview when they have time.

They can do it at night or on the weekend. They don’t need a login.

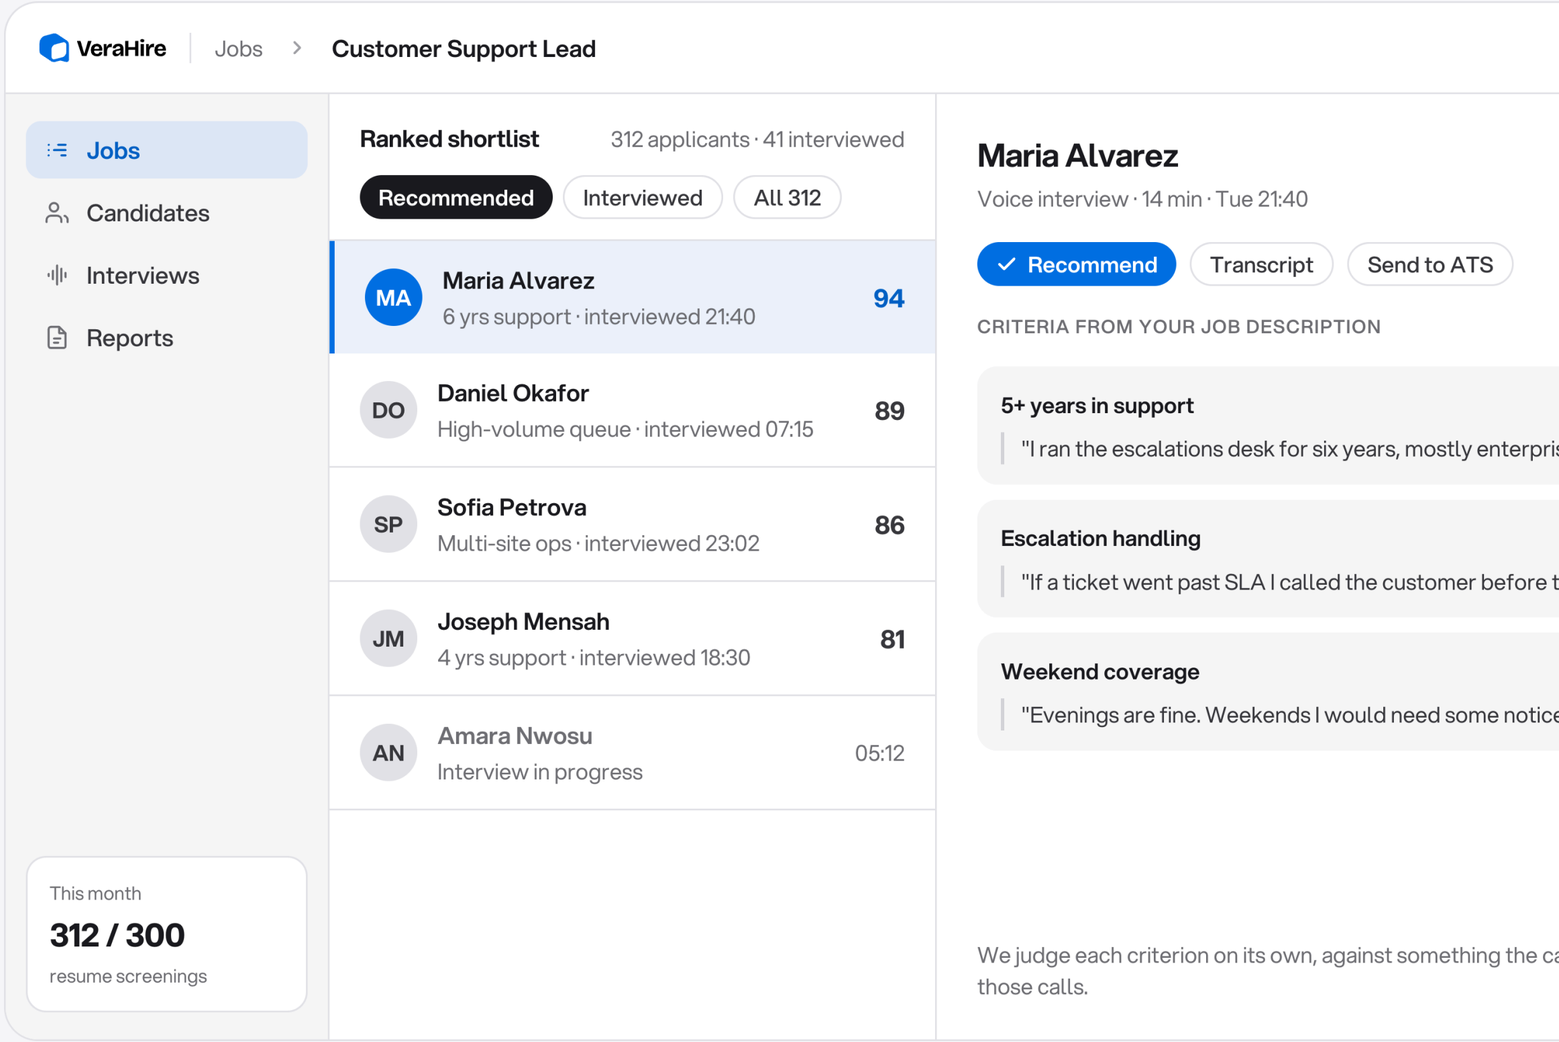

The interview is a voice conversation with the AI. It usually takes 10 to 15 minutes. The AI says it is an AI at the start.

VeraHire

Your team gets a ranked list of candidates.

You can listen to each interview or read the transcript. The report links each score to a line in that transcript.

VeraHire

A person on your team decides who to hire.

VeraHire ranks the candidates and explains each score. By default, a person reads the report before any decision.

VeraHire

VeraHire works with the hiring software you use today.

50+

integrations with applicant tracking systems and HR software. You can also use VeraHire on its own.

greenhouse LEVER workday.

15 to 30

minutes to set up. You paste a job description, check the criteria and invite candidates.

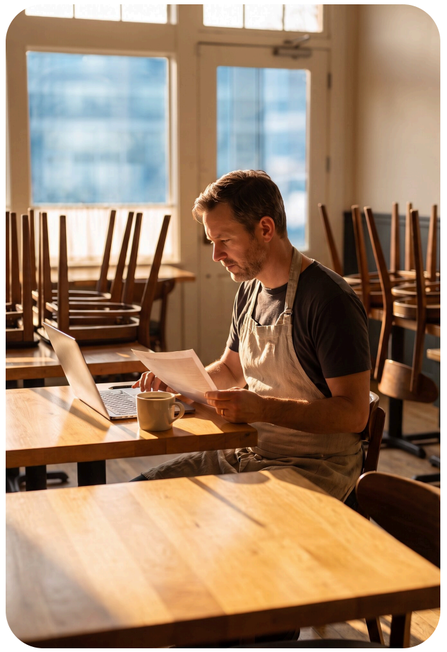

VeraHire is for teams that hire at high volume.

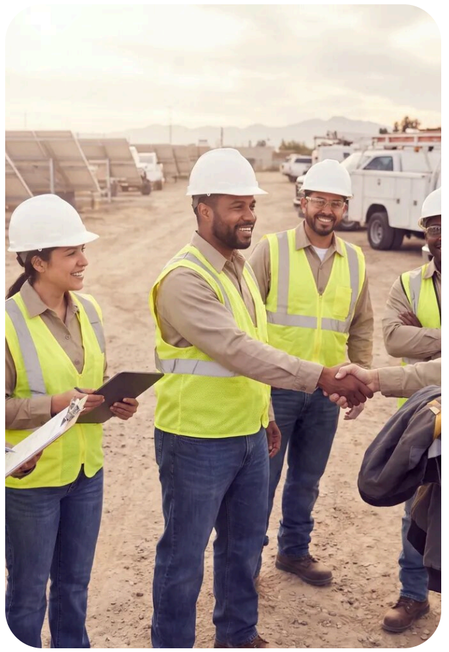

Staffing & RPO

BPO & outsourcing

Hotels, restaurants & retail

Field & frontline

Clinics

It also fits tutoring companies and consumer-service marketplaces.

Three customers describe their experience.

prialto

"VeraHire took only about 30 minutes to set up. The quality and insight from the interviews was better than we expected...we experienced immediate benefit from the detailed assessment of a high volume of candidates, both increasing the number and quality of individuals moving to the next stage of our process."

Phil Odella
Head of Operations, Prialto

tawkify

"The AI interview and resume analysis have already saved us about two weeks of work by providing us with five suitable candidates for the assignment. The job was posted only this past Friday, and we're already making great progress."

Kristy
Head of HR, Tawkify

LEYLINES

"Once you've used VeraHire, you'll never want to do it manually again. It's so good!"

Sebastian
Co-founder & COO, Leylines

An independent auditor tested VeraHire for bias.

Joellie AI audited VeraHire's resume screening and interview analysis under New York City's Local Law 144 standard. It found no conclusive evidence of disparate impact by race, ethnicity or sex.

11,725

resume screenings in the audit

937

interview transcripts in the audit

The audit is not a certification, and it is not a guarantee that any hiring process is free of bias. You can read the full results at verahire.ai/bias-audit.
